

At Phase 3 Communications, our #1 goal is to provide businesses and institutions with the infrastructure necessary for reliable, high-speed communication. That's why we specialize in the installation and maintenance of Fiber Optics Networking Infrastructure of any size and complexity.

The fiber optics technicians at Phase 3 Communications are highly skilled and professionally trained in the installation, termination, splicing, and testing of fiber optics technology in virtually every possible environment. We have invested extensively in specialized fiber optics materials and supplies, from hydraulic bucket trucks and other heavy equipment to highly advanced splicing, terminating, and testing machines and tools.

But it's our dedication to high standards of [versatility, craftsmanship, and responsiveness] that have allowed us to grow into one of the west coast's most trusted communications companies.
